## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-7 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art neither discloses nor makes obvious the combination set forth in the claims by not disclosing a hand-holdable unit adapted to pump air into a vehicle tire comprising: an air-dispensing nozzle unit on the second end of the housing unit and including as O-ring seal located adjacent to the air-dispensing opening, and a front plate located adjacent to the O-ring seal, the front plate including a first actuator element leg-accommodating hole. The hole located to be adjacent to and aligned with the first operating opening defined through the second end of said housing unit. A second actuator element leg-accommodating hole located to be adjacent to and aligned with the second operating opening defined through the second end of said housing unit. A nozzle housing unit having a longitudinal axis extending between the dispensing end of the nozzle housing and the inlet end of the nozzle housing and being co-linear with the longitudinal axis of said housing unit when said air-dispensing nozzle unit is in place on the housing unit. A wishbone actuator element movably located inside the nozzle housing, the wishbone actuator element moving in the nozzle housing between a first position with the forward end of the body extending out of the air-dispensing opening in the dispensing end of the nozzle housing and in a position that is adapted to engage and operate a valve opening element of a tire valve of a tire of a vehicle.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- Smalley (5,967,198) teaches a tire inflation apparatus including a source of compressed dry gas.
- Rimington et al. (5,407,330) teach a portable air pump apparatus with a vibration and sound reducing housing.
- Fussell (4,621,984) teaches a portable air pump capable of inflating a tire.
